

Medidata Professional Services

Realize the Value of Your Medidata Solution

Medidata professional services offer unmatched expertise in clinical trials and broad knowledge across study phases and therapeutic areas. Our deep and unique understanding of the latest technology, R&D practices and business processes—including risk-based monitoring, clinical trial supply chain optimization, CRO governance and more—enables us to provide flexible implementation services, sponsor enablement and CRO partner support, and strategic consulting to maximize the value of your clinical research. Whether you are a leading multinational pharmaceutical, an innovative medical device start-up or a CRO, Medidata professional services has the skills and experience to meet your needs.

The Medidata professional services team provides unrivaled operational insight to optimize your trials by drawing on robust industry metrics aggregated in the Medidata Clinical Cloud. Our clinical records encompass data from:

470+
Contributing sponsors

8,700+
Studies

227,000+
Sites

2M+
Patients

120+
Countries

- Medidata Study Implementation Service delivers fast, flexible, optimally designed trials. Our proven, methodology and consultative approach will save you time and money.
- Medidata Sponsor Enablement Service lets you continuously realize the full value of your Medidata solution. Training and mentoring enable you to take full ownership of your clinical trial systems and process.

Medidata Study Implementation Service

Medidata's study implementation service team builds fast, flexible and optimally designed trials on behalf of sponsors and their CRO partners. We have unmatched expertise and experience that ensures that your study will be built using best practices, accelerating your clinical trial while ensuring high quality. Available to pharma, biotech and medical device companies across all therapeutic areas and trials phases, our implementation services can be applied to both new and currently ongoing studies.

Your business operates multiple clinical and enterprise systems that you may need to integrate with your clinical trial solutions. Medidata offers technical services that ensure that you can easily leverage all of your existing systems through integration at the application, analytic or data level.

Medidata Sponsor Enablement Service

The Medidata Sponsor Enablement Service is dedicated to helping clients get the most out of the Medidata Clinical Cloud™, reducing study costs, accelerating timelines and lowering risk.

The first phase of engagement is to help clients simplify, standardize and optimize their clinical trial processes, based on industry best practices. Medidata consultants work closely with client teams, providing training and mentoring on Medidata solutions so that the client develops the capability to autonomously create efficient, best-practice studies, without being dependent on CROs or Medidata. Simplification, standardization and self-sufficiency drive significant cost savings.

The emphasis of the enablement service then transitions to continuous process improvement, achieved both through progressive adoption of the Medidata Clinical Cloud and ongoing process refinement. As a result, clients experience a continuous acceleration of their studies.

Medidata also provides comprehensive program management throughout the engagement process, including project management, performance management and client advocacy, greatly reducing risks typically associated with systems and process enhancements.

Medidata Support for Success

The Medidata professional services team is ready to help your life science organization realize the full potential of the Medidata Clinical Cloud. To get started, contact your Medidata account manager or services project manager, or email us at **MedidataConsulting@mdsol.com**.

About Medidata

Medidata Solutions is the leading global provider of cloud-based solutions for clinical research in life sciences, transforming clinical development through its advanced applications and intelligent data analytics. The Medidata Clinical Cloud™ brings new levels of productivity and quality to the clinical testing of promising medical treatments, from study design and planning through execution, management and reporting. We are committed to advancing the competitive and scientific goals of global customers, which include over 90% of the top 25 global pharmaceutical companies; innovative biotech, diagnostic and device firms; leading academic medical centers; and contract research organizations.
